When Speed and Safety Matter

Black & Veatch’s Rapid Modular Health System (RaMHS) is a modular medical structure that expands secure site-based screening capabilities at government facilities, office locations and other distributed locations to minimize the risk of coronavirus exposure to office staff, public-safety professionals, and the community.

U.S. Defense Threat Reduction Agency Experience

Black & Veatch designs and builds biological Safety Level 3 (BSL-3) testing facilities to research dangerous pathogens. Black & Veatch tracks infectious diseases in more than 20 countries for the U.S. Government.

Immediate response capability (within 24 – 48hrs at 10+ sites) to provide a separate, resilient, and scalable module for testing and screening patients for COVID-19.

Scaled deployment and services for maximum adaptability.

Investing in innovators to provide additional solutions that will benefit the healthcare system.
Rapid Modular Health System (RaMHS)

**Rapid Deployment**
Rapid Modular Health Systems are there in a few days when you need them to ensure that everyone is screened, tested and treated for coronavirus.

**Enhanced Safety & Security Climate**
Healthcare professionals should work in a controlled weather-resistant and lockable space; providing security for personnel and equipment in any environment. The temporary tents provide neither and are not sustainable.

**Innovative Technologies**
Imagine a space that has disinfection for PPE, sanitized with hydrogen peroxide and has the data and analytics capability to record and measure where patients have been. Black & Veatch is currently engaging entrepreneurs to partner with them to provide real time solutions for the present situation and beyond.

**Proven Partners**
Black & Veatch completes thousands of projects for essential utilities as well as Federal, state and local government clients each year. From power, water, and communications infrastructure, to the most complex mission critical projects, we deliver what you need with local partners you know and trust.

**Black & Veatch is where you need us**

**Visitor Screening Journey**

Sally has a meeting at City Hall.

She arrives for her meeting and is sent to a Rapid Modular Health System (RaMHS) for screening.

Screening is performed safely and confidentially.

Screening outside Town Hall reduces risk to elected official, staff and the community.
